Oh Great - now "the Microsoft way" will be indelibly etched into the students who grow up to be the adults who will be making buying decisions for future generations - all they will know about operating systems and software is that which Microsoft spoon feeds them.

They will provide \$\$ for teacher training and copies of Windows and Office. Are they going to teach the teachers how to use the Microsoft products with the Microsoft \$\$? How sweet. And you think the rest of us can't see right thru this.....it smells really bad!
